U-Series Air Circuit Breakers

Hyundai Heavy Industries (HHI) ACB meets your demands for high breaking capacity, full line-up, and optimized panel size. Various accessories and connection methods realize user-friendly handling.

Features

| Full line-up |

- U-Series ACB maximize your choice and satisfaction with compact size and dual (UAN/UAS) model.

※ - Breaking capacity is at AC500V.

1) D frame will be available from 2015-1st half.

| Applications |

- U-Series ACB offering high breaking capacity and advanced protection trip relay is suitable to cover various applications including buildings, data centers, industrials and so on. U-Series ACB protects these facilities from harmonic frequency by 100 % capacity of N phase.

Buildings

- Multipurpose buildings
- Hospitals
- Commercial buildings
- Hotels

Data centers & Networks

- Broadcasting stations
- IT/Telecommunications

Industrials

- Steel/Metal
- Gas/Chemical
- Pulp/Paper

Electric power facilities

- Electric power stations
- Electric power substations
- Dispersed power generators
- Renewable energy facilities

| Compliance with standards |

■ Standard

• IEC 60947-1,2	International Electrotechnical Commission
• EN 60947-2	European Standard
• GB	China National Standard (Guojia Biaozhun)
• GOST R 50030.2-99 9	Government Standard of Russia
• GOST R 50030.1-2000	Government Standard of Russia
• KS C 4620	Korean Standards Association

■ Approval

• ISO 18001, 14001, 9001	
• KS/KOREA	Korea Quality Certificate Standard Association
• CE	Community European
• GOST-R/RUSSIA	Government Standard of Russia
• CCC/CHINA	China Compulsory Certification
• KR/KOREA	Korean Register of Shipping
• GL/GERMANY	Germanischer Lloyd
• LR/U.K	Lloyd's Register of Shipping
• ABS/U.S.A	American Bureau of Shipping
• BV/France	Bureau Veritas
• NK/JAPAN	Nippon Kaiji Kyokai
• DNV/NORWAY	Det Norske Veritas
• RINA/ITALY	Regisero Italland Navale
• RS/RUSSIA	Russian Maritime Register of Shipping

■ CB type test

• DEKRA	Formerly KEMA Quality Registered
• KERI	Korea Electrotechnology Research Institute

[Cradle]

- ① UVT time delay controller
- ② Remote operation module
- ③ Temperature detection module
- ④ Short "b" contact
- ⑤ Position switch

- ⑥ Mechanical interlock kit
- ⑦ Phase insulation barrier
- ⑧ Mechanical operated cell (MOC) switch
- ⑨ Dummy ACB
- ⑩ Miss-insertion preventer

- ⑪ Safety shutter
- ⑫ Arc shield
- ⑬ Control terminal protection cover

Features

| High performance protection trip relay (OCR) |

- The protection trip relay (OCR) of U-Series ACB supports stable power supply with temperature alarm, fault recording, and others in addition to main protection functions.

Features

| Multiple terminal busbar connections |

- Increases the user's convenience by diversified terminal connection methods according to busbar's type.
- Simply turn a horizontal connector in 90° to make it a vertical connector (The opposite case is the same).

■ Standard connection

■ Mixed connection (Top/Bottom)

- ※ - Changing connector is available only for UAN/UAS A frame 630 - 1,600A, UAN/UAS B frame 2,000 - 3,200A.
 - Front connection type is suitable for panels with limited installation space.
 - When changing connections above 4,000A, additional component is needed. Please contact us.

| Easy-to-install |

■ Fixed type

- Installed in a switchboard directly.

■ Draw-out type

- Consists of ACB and cradle.
- Cradle is fixed to a switchboard.
- ACB may be in the position of CONNECTED, TEST, ISOLATED, and REMOVED.
- Switchboard door may be closed when (ACB is) in ISOLATED position.

[Draw-in/out guide rail]

Connected position

- Main and control circuit are all connected.
- Normal condition of use

Test position

- Main circuit is isolated, control circuit is connected.
- Control test is possible when switchboard's door is closed.

Isolated position

- Main and control circuit are all isolated.
- Switchboard door may be closed in isolated position.

Removed position

- ACB is totally drawn out from the cradle.

- ㉖ Battery

※ Self power works normally at larger than 10 % for 3 phase, 30 % for single phase.

But in case of using 200A CT , larger than 15 % for 3 phase, 100 % for single phase.

※ Mark BB when ordering if you use MCR function. Auxiliary contacting point is 4a5b.

| UPR-LAG (52,62) |

- Overload protection
 - Long time delay
 - Thermal function
- Short circuit protection
 - Short time delay, instantaneous trip
 - I^2t on/off optional (for STD)
- Earth leakage protection
 - Use ZCT for 5A output at secondary (3 % tolerance)
 - GPR setting calculation is done with reference 5A at secondary ex) When using 100:5A, in order to work primary working at 30A, $30 \times 5 / 100 = 1.5A$, GPR set to 2A,
- Neutral wire protection
 - 3 Pole: No protection
 - 4 Pole: Non, 50 %, 100 % ($\times I_r$, I_{sd} , I_i)
- Measurement and Display
 - 3 phase current
- Realization of protective coordination by ZSI (zone selective interlocking)
- Fault recording
 - Record up to 256 fault information about fault type, fault phase, fault value, occurrence time of fault.
 - Record latest fault waveform (4 period, check by communication)
- Event recording
 - Record events of device related to setting change, operation and state change up to 200
- Pre-trip alarm
 - Prevent unnecessary over load trip according to rated current (I_n)

- Field test
 - Simulation of long time, short time, instantaneous delay
- Communication: RS-485/Modbus-RTU
- 4a DO (digital output)
 - Contact specification

Operation characteristics |

Long time delay (LTD)

Standard current setting

- **L type**
 - The scale is marked as magnification of $[I_n]$.
 - Setting range: (Non, 0.8, 0.83, 0.85, 0.88, 0.9, 0.93, 0.95, 0.98, 1.0) $\times I_n$ (10 steps)
 - No protection in case of non setting of $[I_r]$.
 - The breaker does not trip below 105 % of $[I_r]$, and trip at 120 % and above.
- **S type**
 - Setting range: (Non, 0.7, 0.8, 0.9, 1.0, 1.05, 1.1, 1.15, 1.2, 1.25) $\times I_n$ (8 steps)
 - The breaker is tripped above 100 % of $[I_r]$.

Time delay setting

- **L type**
 - Standard operating time (sec) is based on the time of $600 \% \times [I_r]$ with inverse time operation.
 - Setting range: 0.5, 1.25, 2, 2.5, 5, 10, 15, 20, 25, 30 sec (10 steps)
 - The breaker is tripped at $\pm 15 \%$ of setting time.
- **S type**
 - Standard operating time (sec) is based on the time of $120 \% \times [I_r]$ with inverse time operation.
 - Setting range: 10, 15, 20, 25, 30, 35, 40, 50, 60 sec (9 steps)
 - The breaker is tripped at $\pm 15 \%$ of setting time.

Short time delay (STD)

Standard current setting

- **L type**
 - The scale is marked as magnification of $[I_n]$.
 - Setting range: (Non, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 10) $\times I_n$ (10 steps)
- **S type**
 - The scale is marked as magnification of $[I_n]$.
 - Setting range: (Non, 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5) $\times I_n$ (10 steps)

Time delay setting

- **L type**
 - Standard operating time (msec) is based on the time of $110 \% \times [I_{sd}]$ with definite time operation.
 - Setting range: 50, 100, 200, 300, 400, 500 msec (6 steps)
 - 1,000 % of inverse time curve applied in case of inverse time (I^2t on) setting.
- **S type**
 - Standard operating time (msec) is based on the time of $110 \% \times [I_{sd}]$ with definite time operation.
 - The range of set time is 50, 100, 200, 300, 400, 500 msec (6 steps).
 - 500 % of inverse time curve applied in case of inverse time (I^2t on) setting.

Instantaneous trip (INST)

Standard current setting

- The scale is marked as magnification of $[I_n]$.
- Setting range: (Non, 2, 3, 4, 6, 8, 10, 12, 15) $\times I_n$ (9 steps)
- No protection in case of $[I_i]$ is set to Non.

Time delay setting

- Total breaking time is below 50ms.

Protection Trip Relay (OCR)

Operation characteristics |

Standard current setting

• L type

- The scale is marked as magnification of OCR rated primary current [Ict].
- Setting range: (Non, 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 1.0) × [Ict] (10 steps)

Time delay setting

• L type

- Standard operating time (msec) is based on the time of $120\% \times [I_g]$ with definite time operation.
- Setting range: 50, 100, 200, 300, 400, 500 msec (6 steps)
- Inverse time operated with 100 % of [Ict] standard in case of [I²t on] setting.
- The breaker is tripped at $\pm 15\%$ of setting time.

Standard current setting

• UPR LAZ

- This setting value is indicated primary current.
- The range of value is 9 steps Non, 0.5, 1, 2, 3, 5, 10, 20, 30 (A)

• UPR LAG

- This setting value is indicated secondary current of ZCT.
- The range of value is 7 steps Non, 0.5, 0.8, 1, 2, 3, 5 (A).

Time delay setting

• L type

- Settings within its alarm range will prevent its breaker from tripping but activating its alarm.
- Trip time: 60, 140, 230, 350, 800 msec (5 steps)
- Alarm time: 140, 230, 350, 800, 950 msec (5 steps)

Standard current setting

• L type

- The scale is marked as magnification of [In] with definite time operation.
- Setting range: (Non, 0.6, 0.65, 0.7, 0.75, 0.8, 0.85, 0.9, 0.95, 1.0) × In (10 steps)

• S type

- The scale is marked as magnification of [In] with inverse time operation.
- Setting range: (Non, 0.7, 0.75, 0.8, 0.85, 0.9, 0.95, 1.0, 1.05, 1.1) × In (10 steps)

Time delay setting

• L type

- Standard operating time (sec) is based on the time of $100\% \times [I_p]$.
- Setting range: 5, 10, 15, 20, 40, 60, 80, 120, 160, 200 sec (10 steps)

• S Type

- Standard operating time (sec) is based on the time of $120\% \times [I_p]$.
- Setting range: 1, 5, 10, 15, 20, 25, 30, 35, 40 sec (9 steps)

| Characteristic curves |

General feeder

- ① Long time delay current setting range
- ② Short time delay current setting range

- ③ Instantaneous tripping current setting range
- ④ Ground fault trip current setting range

- ⑤ Pre-trip alarm current setting range

Protection Trip Relay (OCR)

| Characteristic curves |

| Measurement |

■ Outside view

■ Voltage module

- UPR-LP/LH/SP trip relay offers VM (voltage module) as an essential option, to measure voltage.
- Voltage input range: AC69 - 690V

Voltage connection

3 P 3 Wire

4 P 4 Wire / 3 P 4 Wire

Protection Trip Relay (OCR)

| Zone selective interlock function |

Zone selective interlocking drops delay time that eliminates faults for breakers. It minimizes the shock that all kinds of electric machineries get under fault conditions.

■ Example

- 1 In case of that short time-delay or ground fault accident occurs at ZSI built in system, the breaker at accident site sends ZSI signal to halt upstream breaker's operation.
- 2 To eliminate a breakdown, trip relay of ACB at accident site activates trip operation without time delay.
- 3 The upstream breaker that received ZSI signal adhere to pre-set short time-delay or ground fault time delay for protective coordination in the system. However upstream breaker that did not receive its signal will trip instantaneously.
- 4 For ordinary ZSI operation, it should arrange operation time accordingly so that downstream circuit breakers will react before upstream ones under overcurrent/short time delay/ground fault situations.
- 5 ZSI connecting line needs to be maximum 3m.

※ It is not available in self-power OCR.

| System diagram |

| Communication function |

■ Modbus-RTU / RS-485

- Operation mode: Differential
- Distance: Max.1.2km
- Cable: RS-485 shielded twist 2-pair cable
- Baud rate: 9,600, 19,200, 38,400 bps
- Transmission method: Half-duplex
- Termination: 150 Ω

※ 1) Terminal busbar (drawout type) A frame 630 - 1,600A / B frame 2,000 - 3,200A - only drawout type can be ordered.

2) Terminal busbar (fixed type) A frame 630 - 1,600A / B frame 2,000 - 3,200A - only fixed type can be ordered.

3) Auxiliary switch: AUX SW UAS type standard DO contact is 3a + 3b, UAN type standard DO contact is 5a + 5b.

4) Motor: If you want to order motor as set for motor installation, inquire us separately.

5) UVT delay type controller: UVT delay type controller can be attached outside of main body or cradle.

6) Protection relay (OCR) is 50Hz Type: 5□/60Hz Type: 6□.

7) Position switch cannot be used more than one, and can be attached on the right side of cradle.

8) Mechanical interlock unit is wire type. MI unit can be attached on the outside of main body or cradle, and interlock device can be attached inside of main body.

| Motor |

- Manual charging method and geared motor charging by external power source.
- Operating voltage range: 85 - 110 %
- When ordering, add M1-M9 in the order form.
- It can be ordered separately.

■ Connection diagram

| Spring charging switch |

- These contacts (No. 15,16) are for delivering spring charge status to outside.
- Optional device mounted on the body.
- Ordering code: B6, UANS B6 (Spare part)

Accessories

| Closing coil |

- A control device which closes a circuit breaker remotely, when applying 85 - 110 % of rated control voltage over 150 ms to coil terminals (3,4).
- When ordering, add C1 - C9 in the order form.
- It can be ordered separately.
- Use a separate switch when supplying voltage to a closing coil.

Trip coil

- A control device which trips a circuit breaker remotely, when applying 70 - 110 % of rated control voltage over 150 ms to coil terminals (7,8).
- When ordering, add S1 - S9 to the order form.
- It can be ordered separately.
- Use a separate switch when supplying voltage to a trip coil.

Accessories

| Secondary trip coil |

- A control device which trips a circuit breaker doubly from the outside.
- Not available with UVT (Under-voltage trip) coil when installing double trip coil.
- Rated control voltage range 70 - 110 %, applying voltage over 150 ms to coil terminals (9,10).
- When using secondary coil, UVT coil cannot be used at the same time.
- When ordering, add S1 - S9 to the order form and to the option order part.
- It can be ordered separately.
- Use a separate switch when supplying voltage to a trip coil.

Trip coil supervision

- To trip the circuit breaker, 70 - 110 % of rated control voltage should be applied to both terminals (7,8) over 150 ms.
- Add your selection (S1 - S9) to main body's ordering code and mark T1 - T9 in option list.
- When using trip coil supervision, aux. contact is 4a3b (Not available aux. switch 43/44, 53/54).
- Output contact is No. 59.
- Coil supervision checks not only circuit's mechanical contact but also the condition of coil
- When ordering, add T1 - T9 to the order form.
- When using trip supervision coil, 6a6b aux. Contact is not available (Addition of 1a1b is not applicable).

Accessories

| UVT coil |

- If the voltage of the main or the control power is under 70 % of the standard, UVT breaks the circuit automatically.
- Connect instantaneous type with both terminals (9,10) and connect with time delay type in order to present time delay controller.
- - The circuit breaker is opened with trip unit power supply voltages below 70 %.
- - The circuit breaker is closed with unit power supply voltage above 85 %.
- Instantaneous type can not be used with double trip coil.
- When using instantaneous type, add U1 - U9 in the order form.
- It can be ordered separately.

■ Connection diagram

| UVT time delay controller |

- Use of UVT time delay controller is recommended to prevent tripping when the power supply network for the trip unit is subject to brief voltage drops or power supply failures.
- This device is possible to delay as (0.5, 1.0, 1.5, 3 sec).
- It can be mounted at the left side of cradle or the DIN rail.
- Controller is mounted at cradle (Draw-out type) or outside of main body (Fixed type).
- When ordering, add V1 - V9 in the order form. Time delay controller will be included in the packing.
- When ordering UVT time delay controller only, please order the separate product, UANS UT1 - UT9.

■ Connection & Operating time

※ The condition of 5, 7, 9 contacts is the state when UVT's operation.

■ Connection diagram

■ Connection diagram

Accessories

| Auxiliary switch |

- A contact to monitor On/Off position of ACB remotely.
- 3a3b is provided as standard for UAS type and 5a5b is standard for UAN type.
- Applicable AUX switch is up to 6a6b. Add AA on your order.
- When working with monitoring contact for trip coil the AUX switch will be 3a3b. When working with OCR's MCR function it will be 4a3b.
- When ordering short "b" additionally it will be attached to 'b' contacts 51, 52 when the product is out. The additional short b which enclosed in the product is applicable as the number of the b contact.
- 5a5b can be ordered separately. Add UANS AS on extra order.

■ Ratings

Rated input voltage	AC110V	AC220V
Normal charging voltage	DC145V	DC290V
Normal current capacity	DC2A	
Rated frequency	50/60Hz	
Delay circuit time	within 1.5 sec	
Applicable standards	IEC 60694 / KSC 4611	

| Lifting lug |

- A device to make an ACB easy to shift.
- Hang it to both handles of the arc shield, cradle, and ACB.
- When handling products, please be sure to use crane. In case of products under 3,200A and handling cradle only, please comply with safety regulation.
- Offered 2ea of 1set as a standard in "C", "D" frame. (more than 5,000AF)
- When ordering separately, please order UANS AL.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Lifting lug	-	UANS AL	2ea/set (Supplied as standard only for C frame)	○	○	Outside of ACB body & cradle

| Dummy ACB |

- The dummy ACB which is a frame to apply electric current can conduct ACB's function temporarily when the maintenance work takes long due to malfunction.
- When connecting the dummy ACB please check the primary power is out since the CB is close.
- The early stage of each frame is maximum rated current.
- It can be ordered separately.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position

Accessories

| Mechanical interlock kit |

- It is used to interlock closing and trip between two or three breakers mechanically so as to prevent unintended operation at the same time.
- The MI is a safety gear installed in ACB for distribution line and it creates a mechanical interlock between two or three circuit-breakers through each CB's open/close work.
- To operate the MI every component linked to the MI unit and the MI must be combined before use.
- MI unit is separate product. After installing ACB it is additionally attached.
- When ordering B0 all components linked to the MI unit are provided.
- Order other separate kits when having purchased only ACB without B0.
- MI wire should be connected under 2m between ACBs.
- In order to installation, need to square hole 100×200 (mm).

| Terminal busbar |

Standard connection

Mixed connection (Top/Bottom)

- U-Series ACB have the following front types: Vertical, horizontal, top vertical-bottom horizontal and top horizontal-bottom vertical type. There are also P-types which have no terminal cradle and fixed body type. For these models (P and fixed body type) separate terminal is additionally supplied.
- Separate terminal is applicable for only A-frame 630 - 1,600[A] and B-frame 2,000 - 3,200[A].
- Separate terminal is applicable for only A-frame 630 - 1,600[A] and B-frame 2,000 - 3,200[A].
- Horizontal terminal busbar is delivered separately with ACB and its cradle, so it needs to be installed at site.
- For 2,000/2,500A B-frame, 3,200A terminal busbar is provided.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position

Accessories

| Phase insulation barrier |

- Phase insulation barrier is installed between phases and prevents the arc which may arise and result in short-circuit between phase in advance.
- 3P type needs 2ea, and 4P type needs 3ea of phase insulation barrier, please specify the number of barriers when ordering.
- Please order UANS 3PBAR for 3P type, and UANS 4PBAR for 4P type.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position

| OCR portable checker |

- UAN portable checker tests for the operation of UAN OCR (Long time/Short time delay/Instantaneous/Ground fault).
- It is possible to set current level, phases, and frequency for OCR's test.
- All testing factors are adjustable through front monitor and you can check operating time.
- Battery equipped inside (Available without external power source).
- Ordering code: UANS OC (Spare part)

■ Connection diagram

Item	Specifications
External power	Input: AC/DC100 - 200V, 50/60Hz Output: DC24V, 2.5A
Battery	Alkaline 9V: 3ea
Trip time measurement	0 - 999,999 sec
Test output	0.3Ict - 17Ict
Output precision	±20 % (1Ict - 17Ict)
Size (H x W x D)	193mm x 111mm x 45mm

■ Key Pad

Number	Button	Function
1	UP	Move menu and increasing setpoint
2	DOWN	Move menu and decrease setpoint
3	FUNC	Move to the previous menu and return to the setup screen
4	ENTER	Save the settings and move the number of digits of setting current
5	START	Waveform occurrence
6	STOP	Waveform stop

■ Externals

Number	Button	Function
1	LCD	Menu, setting current, trip time
2	Key pad	Move menu and setting
3	Signal output terminal	OCR connection terminals
4	Power switch	On/Off
5	Terminal	Control terminal of checker

Accessories

| Higher OCR checker |

- Higher checker is auxiliary testing device that verifies ACB operation with unloaded condition.
- It can test basic relays with connected to OCR.
- It can confirm the OCR information by communication.

- Control power: AC/DC85-270V (50Hz/60Hz)
- Size
 - Dimension : 411(L) x 321(W) x 165(H)
 - Weight : 8kg
- Main function
 - LTD, STD, INST, GFT tripping time and pick up test
 - PTA operating time test with connected to PTA contacting point
 - Fault information, setting information, fault phase and real time phase information can be checked from communication with OCR.

Item	Specification
Control power	AC/DC85 - 270V (50/60Hz)
Test output	Output Channel: 4 (R, S, T, N) Test output: 0.4 - 17 Ict Precision: $\pm 3\%$
Input	Communication: RS 485 Touch-Screen of HMI
Size	411 x 321 x 165mm 8kg

| Key lock device |

- The key lock prevents the circuit breaker closing, it maintains interlock condition (Mechanical prevention).
- When the key has been unlocked you can operate spring changing/manual on or off, when the key is removed from circuit breaker it becomes interlock. The key doesn't turn to lock position until user push the off button, when the key is locked.
- Ordering code: AB, UANS AB (Spare part)

| Key interlock |

- Configure the system with three breaker mounted key lock device. Only two breakers are possible for input with two separate keys and the other breaker is interlocked to supply stable load.

Accessories

| Miss-insertion preventer |

- When the main body of ACB is inserted to the cradle that does not match with the ratings of ACB, it mechanically prevents ACB from being inserted into cradle.
- Each part will have been installed on body or cradle.
- This device is set by CT rated current.
- Ordering code: AW (Attachment)
UANS AW (Accessory only)
- Add each ordering code to both body and cradle code.

■ Mounting position according to rated current

CT	Mounting position		CT	Mounting position	
	Cradle	ACB		Cradle	ACB
0 = Without OCR	ADEG	236	K = 1,250A	ABCF	457

J = 1,000A	ABCG	456			

■ Mounting position according to rated current

| OCR & Alarm switch reset |

- When a circuit breaker tripped by fault current or over load and only if the circuit breaker has been tripped by OCR, the MRB operates interlock and resets the interlock to restore electric lines after fault factors have been removed. -(BR)
- When the CB is tripped by OCR it provides functions of interlocking above mechanism -(BR) and output contacts (2a) which check operation of CB by OCR as well. The output contact displays OCR operation by long time, short time delay, instantaneous and ground fault. And resetting above mechanism occurs. -(BA)
- Except above functions when emergent restoration of electric load is needed it automatically reset itself to get ready to open immediately after trip and reset only output contacts.(BH)
- When the CB is tripped by OCR, it provides functions of interlocking mechanism-(BR) and CB condition B shown by high-capacity output contact switch. This output contact is resetted manually.
- It will have been installed when the product is out. Add BR/BA/BH on your order.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position

	BH	UANS BH	for OCR manual reset & Alarm switch reset (DC3A)	☐	☐	

Accessories

| Safety shutter lock |

- An automatic safety device to protect the connectors of main circuit by cutting off dangerous contact from outside while the breaker is drawn out.
- Shutter lock is a locking device which prevents safety shutter from being opened when it is closed. (Key lock is not included. Size is $\phi 5 - \phi 8$)
- Shutter operates separately from power side and load side, so separate lock is possible and its operating mechanism is individual.
- When ordering, please include "AE" in the cradle order form.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Safety shutter lock	AE	UANS AEA3	for A frame, 630 - 2,000A, 3P	○	○	Inside of cradle
		UANS AEA4	for A frame, 630 - 2,000A, 4P	○	○	
		UANS AEB3	for B frame, 630 - 4,000A, 3P	○	○	
		UANS AEB4	for B frame, 630 - 4,000A, 4P	○	○	
		UANS AEC3	for C frame, 3,200 - 5,000A, 3P	○	○	
		UANS AEC4	for C frame, 3,200 - 5,000A, 4P	○	○	

| Arc shield |

- Arc which may arise while breaking fault current is extinguished first by arc chute in main body of circuit breaker and then completely extinguished by arc cover.
- When using arc shield, the insulation distance due to arc fault can be reduced to "0".
- It also makes ACBs to be stored in 4 stories.
- When ordering, please add AX in the order form.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position

| Control terminal protection cover |

- Protects control terminals which are exposed to the outside, and prevent damage from foreign substances.
- Cannot be applied to fixed type ACB and draw-out type ACB with manual connection terminal.
- Not possible to install it both fix type and manual jack type.
- Ordering code: BC (In case of auto-connection mode)

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Control terminal protection cover	BC	UANS BC	for auto connection control terminal	○	○	Control terminal of cradle

Accessories

| Control terminal |

- Two types of connecting control power. Auto connection type which the body connected or isolated from control power automatically and manual connection type which the connector is inserted to the body manually.
- Fixed type is provided with manual control plug type as standard.
- Draw-out type's ordering code: "A" for auto connection, "J" for manual control plug type.
- When manual connection type to be completely drawn out from cradle, its connector should be removed before drawing out.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Control terminal	A	UANS CJ	Auto connection terminal	○	○	Inside of ACB body & cradle
	J	UANS MJ	Manual connection terminal	○	○	

| Short "b" contact |

- A contact which keeps the external control circuit in normal by auxiliary contact which disconnects AUX "b" when ACB is moved from connected position to test position.
- The number of "Shorting "b" contact" corresponds to the number of AUX "b" (5b).
- Ordering code: AK, UANS AK (Spare part)

ACB position	ACB operating	
	ACB close (AUX "b" off)	ACB open (AUX "b" on)
Connected position (Short "b" off)		
Test position (Short "b" on)		

| Fixing block |

- The fixing block can reinforce safety gear to prevent malfunctioning from vibration.
- Able to strengthen bodies, cradles, and panel supporter together.
- ACB and its cradle is delivered with each fixing block installed.
- Add AF on main body of ACB and cradle's order respectively.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Fixing block	AF	UANS AF	for ACB body and cradle	○	○	Outside of ACB body & cradle
		UANS AFB	for ACB body	○	○	
		UANS AFC	for cradle	○	○	

| Counter |

- Displays the total number of on/off operation of ACB
- The counter displays the total number of on/off operation of ACB.
- Extra order is unnecessary (It is a primary component of UAN/UAS).
- Ordering code: UANS AD (Spare part)

Accessories

| Remote operation & Temperature detection module |

- Installed on the cradle or inside of panel, and communicates with Modbus/RS-485 basically.
- Needs to be purchased separately and can be operated with temperature alarm unit at the same time.
- Please refer to page 47 for temperature sensor.

■ Contact specification

	Division	Range of application
ACB control	Contact ratings	10A 240VAC, 30VDC
	Max switching power	2,400VA, 300W

| Temperature detection module |

- Temperature alarm unit is a device to show the busbar's temperature through a sensor inside of ACB.
- Temperature sensor can be installed up to 3ea and alarm can occur when it reaches the specified temperature.
- Display the maximum temperature on the segment LED and transmits through a network.
- Communicates with modbus/RS-485 basically, and needs to be purchased separately.
- Installed on the cradle or inside of panel, and can be operated with remote closing & trip unit at the same time.

■ Contact specification

	Division	Range of application
Temperature alarm	Contact ratings	10A 120VAC/5A 240VAC 5A 30VDC
	Max switching power	1,200VA, 150W

| Temperature sensor |

- The RCTU is used with temperature sensor installed inside of the ACB.
- The temperature sensor is installed in designated position. However user can change the position to applicable extra site.

■ Ordering code

Item	Ordering code		Specification	Application		Mounting position
	Complete parts of ACB/Cradle	Spare part		UAN	UAS	
Temperature sensor	-	UANS TSN	Temperature sensor	○		Inside of cradle

Accessories

| Remote control temperature unit |

- RCTU has Digital Output contact that ables remote insertion/disconnection of ACB by communication. It checks temperature of ACB with 4 temperature channels.
- RCTU communication offers RS-485/Modbus-RTU.
- Insertion/disconnection control of ACB assures its reliability through SBO (select before operation) function.
- If the temperature rises over the user setting value, you can check it through alarm contacting point (additional connection needed).
- You can check ACB temperature through segment LED at the front.
- RCTU can be installed in side of the ACB cradle or panel.
- RCU module has same function as RCTU module except for the temperature monitoring.

| Contact(DO) specification |

	Type	Range
ACB control	Contact ratings	10A 240VAC, 30VDC
	Max switching power	2,400VA, 300W
Temperature alarm	Contact ratings	10A 120VAC/5A 240VAC/5A 30VDC
	Max switching power	1,200VA, 150W

| Shape |

	Status LED	Information
RCTU	Run LED	RCTU running LED
	Com LED	Communication LED
	Temp. Alarm LED	Temp. Alarm LED
	Alarm DO LED	Temp. Alarm DO LED
General digital input	DI 1	Dry contact(5V)
	DI 2	Dry contact(5V)
ACB control	CB Cloes	ACB close LED
	CB Open	ACB open LED
	CB Error	ACB close/open terminal disconnection & controlling error

Communication setting

Temperature signal

| IR sensor measurement |

- IR sensor should be installed in appropriate distance between sensor and measuring point.
- Recommended distance is 50-80mm.
- Measuring point should be reflectionless surface and we recommend painting it with matt black paint for the nature of IR sensor.

⚠ CAUTION

1. IR sensor differs value by the reflectivity of metal surface. Measuring point should be varnished or painted with matt black paint depending on material.
2. Measuring point and IR distance differs measuring spot size by D:S ratio. This sensor has 8:1 scale.

| Draw-in/out device unit & Position lock device |

- Draw-in/out device unit is mounted on the body of draw type ACB as standard.
- Draw-in/out device unit consists of draw-in/out handle storage space, push button, position indicator, pad lock.
- Position pad lock is a safety device as locking draw-in/out function in connected/test/sol position.
- This device is offered as standard except key lock.
Available key lock size: $\phi 5 - \phi 8$
- **Ordering code: UANS DR (Spare part)**

| Draw-in/out handle |

- Draw-in/out handle is attached on the side of cradle as standard.
- **Ordering code: UANS L handle or UANS U handle**

■ UANS L handle

■ UANS U handle

■ T-type handle

Accessories

| Neutral CT |

- The NCT is additionally applied for 3-pole circuit breaker when it is connected to distribution line (3 phases 4 lines).
- For distribution line (3 phases 4 lines) 3pole circuit breaker can protect the ground fault. However, we can not classify unbalanced load and ground fault. To complement this when only a ground fault occurs the NCT senses the N phase load and operates the GFT.
- When connecting a relay or electric instrument checking phase is mandatory. Please connect the designated terminal.
- It is a separate product. Refer to the table below (Rated current level) and check the item on your order.

■ Ordering code

Item	Ordering code	Specification
Neutral CT	UANS NCT_T	NCT T = 630A/Inner Diameter 80
	UANS NCT_H	NCT H = 800A/Inner Diameter 80

	UANS NCT_Q	NCT Q = 4,000A/Inner Diameter 200
	UANS NCT_S	NCT S = 5,000A/Inner Diameter 200
	UANS NCT_X	NCT X = 6,300A/Inner Diameter 200

■ Dimension

| Door flange |

- Protects the protruding front of ACB and the cutting side of panel door by attaching it to the panel door.
- Both fixed/draw-out type are the same size of the panel cutting, even if the dust cover is installed.
- Refer to dimension for panel cutting size.
- Protection rating of IP30.

■ Panel door cutting dimensions

Accessories

| Automatic transfer switch & Controller |

■ Features

- **Stable transfer system**
Provides definite protection for electric power system by using Hyundai ACB which has the highest breaking capacity.
 - **An unmanned working system**
An unmanned automatically transferring system is realized by installing auto power control device to the ACB with mechanic interlock device.
 - **Various mode**
Offers four selection modes for user's convenience.
 - **Multi protection device**
Multi protection device installed in ACB has various protecting functions such as self-monitoring, simple set up. Unlike existing ATS, it has overload protection to offer stable use.
 - **Compact size · Light weight**
ACB is more compact and lighter. It is easily installed in switchgear and occupies less space.
 - **ATS configuration and interlock**
 - ACB1: "Normal" power (First order side, UN)
 - ACB2: "Stand-by" power (Power generator side, UR)
 - 3 : Mechanical interlock device unit
 - 4 : ATS unit
- Each ACB should meet the following specifications.
- Mechanism of geared motor
 - TC
 - CC
 - Overload or short protection device

| Automatic transfer switch & Controller |

■ Description of mode

• Stop mode

This mode is for compulsory trip of ACB1 (Electric power company) or ACB2 (Power station) when UN (Power supply of electric power company) or UR (Power supply of power station) is available.

• Auto mode

This mode is for transferring a circuit breaker automatically to available power supply of UN or UR.

• N mode

This mode is for compulsory closing of ACB1 when UN is available.

• R mode

This mode is for compulsory closing of ACB2 during the use of UR regardless of that UN is available or not.

Time delay	State display of controller
t1: 0.1 - 30 sec t2: 0.1 - 240 sec	On, Off, Fault

■ Operation characteristic

• UN: Normal power
• UR: Stand-by power

• KR: Control signal for compulsory stand-by power

• KR: Re-checking
• QN: Normal power cut-off

• QR: Stand-by power cut-off
• ■: On/Off

- U-series accessories are only applicable for instantaneous type and only UVT coil can be installed. When you want to use delay type, you can purchase delay type of controller (UANS-) additionally and install externally.
- V-series accessories are only applicable for the delay type and UVT coil is installed on main body, delay type controller is installed at the side of cradle. If you have any problem with size, you can purchase UANS V-series which can be installed additionally.
- B0: Internal part for mechanical interlock should be purchased additionally. If you mark B0, only internally interlocking components are transported with assembly (refer to additional components).
- S-secondary trip coils are not compatible with UVT coil at the same time.
- In case of TSC, AUX S/W becomes 4a4b. And using MCR function of B8 OCR, AUX S/W becomes 4a5b. When using both TSC and MCR function, AUX S/W becomes 3a4b.
- Purchasing with solely main body code [A/J/ Fixed type], it cannot be arranged with cradle accessories. Cradle accessory arrangement is possible when purchased with cradle arrangement. You should purchase additionally when you want main body (UANS-) solely (refer to additional components).
- Position switch cannot be overlapped and can be attached only on the right side of cradle. Inquire us personally if you need another arrangement.
- Internal part for mechanical interlock (B0), mechanical operated cell switch (MOC), fixing block (AF) are not compatible one another.

- BC: Auto connection control terminal cover is only available for the auto connection.
- AK: "Short "b"" is only available for auto connection and attached on 51, 52. It can be attached by the number of "B" points, so additionally purchase if you want to attach more.
- UVT and TC2 cannot be attached both.
- AG: Additionally attached originally, but inserted on front cover when shipped.
- MR: AE, AG, AF, AM are attached as a standard option, so those accessories are not marked additionally.
- AG: AA and BA(BH) cannot be attached at the same time.
- UVT and TC2 cannot be attached at the same time.

- U-series accessories are only applicable for instantaneous type and only UVT coil can be installed. When you want to use delay type, you can purchase delay type of controller (UANS-) additionally and install externally.
- B0: Internal part for mechanical interlock should be purchased additionally, if you mark B0, only internally interlocking components are transported with assembly (refer to additional components).
- In case of TSC, AUX S/W becomes 4a4b. And using MCR function of B8 OCR, AUX S/W becomes 4a5b. When using both TCS and MCR function, AUX S/W becomes 3a4b.
- Purchasing with solely main body code (A/J/Fixed type), it cannot be arranged with cradle accessories. Cradle accessory arrangement is possible when purchased with cradle. You should purchase additionally when you want main body (UANS-) solely (refer to additional components).
- Position switch cannot be overlapped and can be attached only on the right side of cradle. Inquire us if you need another arrangement.
- Internal part for mechanical interlock (B0), mechanical operated cell switch (MC), fixing block(AF) are not compatible one another.
- BC: Auto connection control terminal cover is only available for the auto connection.
- AK: 'Short "b"' is only available for auto connection and attached on 51, 52. It can be attached by the number of "B" points, so additionally purchase if you want to attach more.
- AG: Additionally attached originally, but inserted on front cover when shipped.
- MR: AE, AG, AF, and AM are attached as standard option, so those accessories are not marked additionally.
- AA and BA(BH) cannot be attached at the same time.
- UVT and TC2 cannot be attached at the same time.

※ - Outer part of ACB's ambient temperature is applied for selecting ACB terminal busbar.

- Terminal busbar is copper with no paintings.

- The max. temperature for terminal busbar is 100°C

■ Altitude

U-Series ACB is designed for operation at altitudes under 2,000m. At altitudes higher than 2,000m, change the ratings upon service condition.

Item	Altitude	2,000m	3,000m	4,000m	5,000m
Withstand voltage[V]		3,500	3,150	2,500	2,100
Average insulating voltage[V]		1,000	900	700	600
Max. operation voltage [V]		690	590	520	460
Rectificated rated current [A]		1×In	0.99×In	0.96×In	0.94×In

※ 1) Ta refers to atmospheric temperature outside of panel (IEC 60439-1).

2) Rated current observes temperature condition on test according to IEC 60947-1,2. When installed inside the panel, derating of additional current and using indicated busbar dimension is required.

3) Busbar dimension is manufacturer's recommendation. Smaller busbar requires additional derating.

4) Ventilation should be designed to drop the temperature of switchboard inside the panel.

5) For non-ventilated switchboard, additional forced ventilation should be added to drop the temperature inside the panel.

Area of inlet vents (IP31)		500cm ²				500cm ²						

※ 1) Ta refers to atmospheric temperature outside of panel (IEC 60439-1).

2) Rated current observes temperature condition on test according to IEC 60947-1,2. When installed inside the panel, derating of additional current and using indicated busbar dimension is required.

3) Busbar dimension is manufacturer's recommendation. Smaller busbar requires additional derating.

4) Ventilation should be designed to drop the temperature of switchboard inside the panel.

5) For non-ventilated switchboard, additional forced ventilation should be added to drop the temperature inside the panel.

Operating Conditions

| Ambient temperature |

- Operating condition: -5 °C to 40 °C is recommended.
- The average temperature for 24 hours should be within 35 °C.
- Reduce the continuous conducting current when the temperature is over 45 °C (Refer to derating table, 98 page).

| Load (I/In) |

Load	Using	Effect	Installation
$I/I_n \leq 80\%$	24/24 Hours	-	Normal condition (Recommend)
$80 < I/I_n \leq 90\%$	24/24 Hours	-	Periodic inspection
$I/I_n = 100\%$	24/24 Hours	Plastic insulator color changed	Exhaust added

| Relative humidity |

- Relative humidity should be under 85 %.

| Storage conditions |

- Device without its control unit: -25 °C to 85 °C
- Device with control unit: -15 °C to 70 °C
- The product with charging motor should be stored in open position.

| Atmospheric conditions |

- Do not apply under corrosive or ammonia gas circumstances (H₂S, SO₂, NH₃).
- Use in clean air condition.

| Altitude |

Item	Altitude		
	2,000 m (6,600 feet)	2,600 m (8,500 feet)	3,900m (13,000 feet)
Isolation voltage [V]	1,000	950	800
Operating voltage [V]	690	655.5	552
Allowed current [A]	1 x I _n	0.99 x I _n	0.96 x I _n

| Protection degree provided by enclosures (IP code)|

- Standard: IP30
- With dust cover: IP52

Degree of protection		
	First characteristic numeral	Second characteristic numeral
0	No protection (OPEN)	No protection (OPEN)
1	Protected against solid foreign objects of 50 mm ø and greater	Protected against vertically falling water drops
2	Protected against solid foreign objects of 12.5 mm ø and greater	Protected against vertically falling water drops when enclosure tilted up to 15°
3	Protected against solid foreign objects of 2.5 mm ø and greater	Protected against spraying water (at an angle up to 60°)
4	Protected against solid foreign objects of 1.0 mm ø and greater	Protected against spraying water (Splash proof)
5	Dust-protected (Ingress of dust is not totally prevented)	Protected against spraying jets (Hose proof)
6	Dust-tight (No ingress of dust)	Protected against powerful water jets (Deckwater proof)
7	-	Protected against the effects of temporary immersion in water (Under pressure and time)
8	-	Protected against the effects of continuous immersion in water (Submersible)

Installation conditions

- For the enhancement of the structural safety, please install the fixing block as the following drawing where the product damage is expected due to electrical fault.

(unit: mm)

Model	A	B
UAS06 - 16 A 3P, UAN06 - 20 A 3P	416	440
UAS06 - 16 A 4P, UAN06 - 20 A 4P	501	525
UAS20 - 32 A 3P, UAN20 - 40 A 3P	487	511
UAS20 - 32 A 4P, UAN20 - 40 A 4P	602	626
UAN40 - 50 C 3P	712	736
UAN40 - 50 C 4P	906	982

Ordering Sheet

• To indicate your choice, check the applicable boxes and enter the appropriate information corresponding to your choice.

ACB body	Type of ACB	☐ UAN ☐ UAS ¹⁾											
	Frame size	AF											
		☐ A (630 - 2,000AF) ²⁾			☐ B (630 - 4,000AF) ³⁾			☐ C (3,200 - 5,000AF)			☐ D (4,000 - 6,300AF)		
	Phase type	☐ Standard type (R, S, T, N)						☐ Reverse phase type (N, R, S, T)					
	Number of poles	☐ 3 pole						☐ 4 pole					
	Type of equipment	☐ Draw-out type						☐ Fixed type					
	Terminal connection (Draw-out type)	☐ Manual connection						☐ Auto connection					
	Terminal busbar arrangement (Fixed type)	☐ Horizontal ☐ Vertical ☐ Horizontal/Vertical (Line/Load) ☐ Vertical/Horizontal (Line/Load) ☐ Front type or others ⁴⁾											
	Charging	☐ Manual closing											
		☐ Electrical closing											
	Closing voltage	• Motor operating voltage ☐ AC/DC110V ☐ DC125V ☐ DC24V ☐ DC48V ☐ AC/DC220V ☐ AC380V ⁵⁾ ☐ AC440V ⁵⁾											
	Trip voltage	☐ AC/DC110V ☐ DC125V ☐ AC/DC220V ☐ DC24V ☐ DC48V ☐ AC380V ☐ AC440V											
	Protection trip relay	☐ NO											
		☐ YES

Current transformer	☐ 80A ☐ 160A ...												
Accessory	• UVT coil (Instantaneous type) ☐ AC/DC110V ☐ DC125V ☐ DC24V ☐ DC48V ☐ AC/DC220V ☐ AC380V ☐ AC440V												
	• Double trip coil ¹⁰⁾ ☐ AC/DC110V ☐ DC125V ☐ DC24V ☐ DC48V ☐ AC/DC220V ☐ AC380V ☐ AC440V												
	• Trip supervision coil ☐ AC/DC110V ☐ DC125V ☐ DC24V ☐ DC48V ☐ AC/DC220V ☐ AC380V ☐ AC440V												
	• Auxiliary switch ☐ 3a3b (Standard for UAS) ☐ 5a5b (Standard for UAN) ☐ 6a6b (Maximum)												
	• OCR MCR wire ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• OCR & Alarm switch reset button ☐ BR: OCR (Only for manual reset button) ☐ BA: OCR manual reset+Alarm switch ☐ BM: OCR (Auto reset)+Alarm switch												
	• Counter (Standard)												
	• Fixing block ¹¹⁾ ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• Wrong insertion preventer ¹¹⁾ ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• Key lock device ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• ON/OFF button lock ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• Mechanical interlock ¹²⁾ ☐ Complete parts of ACB/Cradle ☐ Spare part												
	• Spring charge switch ☐ Complete parts of ACB/Cradle ☐ Spare part												

Cradle	Control terminal	☐ Manual connection				
	Terminal busbar arrangement	☐ Horizontal ☐ Vertical ☐ Horizontal/Vertical (Line/Load) ☐ Vertical/Horizontal (Line/Load) ☐ Front type or others ⁴⁾				
	Accessory	• Safety shutter lock ¹³⁾	☐ Complete parts of ACB/Cradle		☐ Spare part	
		• Fixing block ¹¹⁾	☐ Complete parts of ACB/Cradle		☐ Spare part	
		• Wrong insertion preventor ¹¹⁾	☐ Complete parts of ACB/Cradle		☐ Spare part	
		• Arc shield	☐ Complete parts of ACB/Cradle		☐ Spare part	
		• Short “b” contact ¹⁴⁾	☐ Complete parts of ACB/Cradle		☐ Spare part	
		• Control terminal protection cover ¹⁵⁾	☐ Complete parts of ACB/Cradle		☐ Spare part	
• Mechanical operated cell switch	☐ Complete parts of ACB/Cradle		☐ Spare part			
ACB accessory	Purchase separately	• Phase insulation barrier				
		• UVT time delay controller ¹⁶⁾	☐ AC/DC110V ☐ AC/DC220V	☐ DC125V ☐ AC380V	☐ DC24V ☐ AC440V	☐ DC48V
		• Position switch ¹⁶⁾	☐ AQ=Test1C, Connected1C ☐ AT=Inserted1C, Isolated1C ☐ PQ=Inserted1C, Isolated1C, Test1C, Connected1C	☐ AR=Connected2C ☐ AU=Inserted2C ☐ P4=Test2C, Connected2C	☐ AS=Test2C ☐ AV=Isolated2C ☐ P8=Inserted2C, Isolated2C, Test2C, Connected2C	
		• Mechanical interlock	☐ Wire type (2 terminals)		☐ Wire type (3 terminals)	
		• Condenser trip device	☐ AC110V		☐ AC220V	
		• Test jumper	• OCR portable checker			
		• Draw-in/out handle	☐ Standard type	☐ Long type	☐ Universal type	
		• ATS Controller	• Automatic transfer switch & controller			
		• Lifting lug	• Dummy ACB			
		• Door flange	• Dust cover			
		• ZCT (Consultation)	• NCT (Consultation)			
			• Remote operation & temperature detection module			

※ 1) In case of UAS, A frame size is in the range of 630 - 1,600AF and B frame size is in the range of 2,000 - 3,200AF.

2) In case of UAN 20A, only vertical type is available.

3) In case of UAN, B frame size of 630 - 1,600AF is possible.

4) Front type/User installation need to be ordered separately and attached by the customer. 630 - 1,600AF is available for A frame and 2,000 - 3,200AF is available for B frame.

5) Motor of AC380/440V is available from June. 2013.

6) Standard function for general feeder: Ground fault detection.

7) Communication function is not available under no control voltage.

8) LTD/STD/INST/ELT (except. PTA)

9) LTD/STD/INST/PTA (except. GFT)

10) In case of ordering UVT, double trip coil is not available.

11) In case of ordering fixing block and wrong insertion preventer, mark on both ACB and cradle ordering sheet.

12) MI is separate purchasing item, only assembled parts interacting inside of the body are delivered.

13) In case of ordering safety shutter-attachment type, shutter lock is automatically implemented.

14) Fixing block and wrong insertion preventer have to be marked on both the body and cradle orders.

15) Control terminal protection cover is only available for automatic connection type.

16) UVT controller and position switch can be offered as mounted.
